

IN THE NAME OF PEACEFUL COEXISTENCE .

UN , EU & KURDS

Tehran – May 2 , 2009

There are numerous heterogeneous international , regional and local organizations , institutions and NGOs etc , which are known by the respective inhabitants of the world and are involved in the political , economic ,hygienic , judiciary , religious and other fields of their respective life .

In this brief and concise evaluation , I concentrate exclusively on the analysis of United Nations (UN) and European Union (EU) , in relation with the deplorable life of Kurd's community around the globe , which include approximately fifty million people , most of which are either living in divided Iranian , Iraqi , Turkish , Syrian, Armenian Kurdistan or are scattered randomly as a significant refugee /Diaspora community, around the globe.

Despite this obvious fact , that Kurds are approximately a fifty million distinct nation and UN means the organization of the united **nations of the world** - , UN carelessly ignores this vast population's rights ; because it has factually converted into Unites Governments Organization (UGO) ; so (UN) has been performing his routine duties , in the framework of member governments central policies and official agendas only and overlooking the people .

In the UN , for example a member government like Kuwait, with around one tenth of Kurdish population and surface area , has its membership significance and voting power ; but fifty million Kurds are practically ignored at all levels and perspectives.

From other hand , EU which is nominally an European regional organization , has more sponsoring and favorable supporting importance for Kurds . For example there are several leaders in EU membership governments , who can talk **and do** talk more seriously about Kurds' rights and their catastrophic life at EU, than at UN and they can be more effective there . From other hand , due to Turkish governments application for membership at EU , Kurds protests and petitions at EU , in connection with their oppressions , can be more effective than at UN .

With regard to above explanations , Kurds shall bear in mind , that currently EU , might be considered as one of most important organizations in listening to their petitions and complaints , than UN and care shall be taken by all deprived and suppressed nations of the world , like Kurds , Tibetans , Tamil Tigers, Kashmiri , Bask and other similar oppressed communities, try to replace present UN organization , which is working as Unites Governments Organization (UGO), by a real UN, which can advocate their legitimate ignored and suppressed rights in the world .

Historical events, records, documents, anecdotes and interactions , have proved , that Kurds are looking only for a peaceful coexistence and universal equality .
