Effective Medicines To Cure The Mad Rulers' Behavior :

Unfortunately we are witnessing a lot of mass killings ,genocides ,tortures etc in the world , which are mostly masterminded by mad and ferocious rulers/leaders , which is incomparable with the jungle beasts' interactions , such as wolves, tigers , leopards and so on . When we look at the true history pages , it is saturated by shameful invasions , devastations and eradication of innocent human beings by such mad rulers/leaders , which in principally are assigned or elected to serve their community in particular and humanity in general . But the formidable crimes , which are committed by such rulers/leaders , tells us that they suffer from an epidemic psychiatric malady , which urgently requires an effective medicine ; otherwise the human , animal and plant communities of the globe , are formidably exposed to suffer and suffer from extensive threatening annihilations such as those which are committed by Egyptian Pharaohs ; Arabs , during their invasion of 14 centuries ago in most of Middle & Near Eastern countries , North Africa , and so on ; or Mongolian King? Prophet Chinggis Khan's barbarism ; Ottoman Caliphates massacres , Hitler ignited second world war and contemporary Pharaohs of the world .

The danger of such rulers actions do not restrict itself to human , animal and plant domains only ; rather there is the greater danger of exploding the world globe , by highly advanced and sophisticated weaponry and poisonous pollution of the world atmosphere , in such a way that would spoil the present life circumstances on Earth . Now every day ; too , we are witnessing blood streams , in Baghdad , Afghanistan , Pakistan etc , which trembles very heart of every affectionate creature of the world . No animal species is as ferocious and aggressive , as man !!!.

Now we come to main passage of this article : " to introduce an effective medicine for such mad rulers , commanders or so called leaders " , to cure this psychiatric disease phenomena and even to vaccinate them against such pathologies , to prevent them to suffer from it .

In 1970s , I experienced a vegetarian life for about 5 years , during this period, I was not eating any kind meat whatsoever , including poultry , cattle and aquatic animals at all . I was exclusively eating vegetables instead , such as soya beans , peas , different kinds of grains , rice , salads and similar items . During

this period of five years , when I boycotted any animal meat nourishment , I had witnessed and experienced a splendid , efficient , pleasant and calm life . I had an excellent peace of mind , tranquility , peaceful coexistence character . More surprisingly , I did not suffer from any considerable malady during this period . I was able to work more than before , without getting tired . I had affection and human love , instead of antagonism , aggression , retaliation and punishment instinct etc .

Conclusion:

I am not a physician nor evolutionist , but I think man is not created as a carnivorous creature , we can realize this fact from his mouth , tooth and fingers form etc . Artificially , by exploiting the fire and boiling/toasting technique etc, man became a carnivorous animal . But when he eats meat , it leaves numerous heterogeneous negative effects on him , including CRUELTY , EXASPERATION and ANTAGONISM .

So to prevent the rulers/leaders to continue historic killing and massacre etc , I recommend to them to avoid eating any kind of meat , which will enhance their human affection character and suppresses their animalism behavior . I hope one day , before long , among other items , one precondition for a person to assume a ruler/leaders" position , would include " **eating of no meat** " . Then physicians can write prescriptions , to compensate the meat contain , for their body .

In addition to this somehow surprising proposal, which has its roots in my personal experience , if instead of men , women are assigned to such positions , they are more kind , peaceful and affectionate . Rarely you hear about a dangerous homicide action , which is committed by a woman ruler/leader in the history .
